    - Giving Tree 38 participated
    - Café Press Collectors Edition 3 participated
- Made Press in 5 different media venues that we are aware of at least 100,000,000 people benefited:
  - House, MD "Instant Karma" (original air date: 10/15/09) benefited at least 16,000,000 people.
  - Death of Tom Sparks due to APS picked up by AP Wire unknown how many people benefited. (Picked up on TV, radio, internet, newspapers & social networking sites.)
  - Mystery Diagnosis "Falling Through the Cracks" (re- aired several times, original air date: 3/6/2006) unknown how many people benefited.
- Number of Friends of APSFA: 35 benefited.
- Forum Information:

www.apsfa.org apsfa@apsfa.org

- o Average Number of Visitors: 4,671/month High: 5,526 Low: 4,030
- o Average Number of Visits: 13,121/month High: 15,724 Low: 11,143
- o Average Max Online: 15/month High: 22 Low: 11
- o Average Page Views: 46,850 High: 59,509 Low: 32,719
- o Average Number Posts: 1,188/month High: 1967 Low: 690
- o Average Number of Private Messages: 152 High: 269 Low: 37

#### Recommendations:

- Continue to find more avenues for fundraising.
- Continue to collaborate with more organizations (both lay & professional).
- Attend or have materials available for more conferences.
- Apply for more grants.
- Continue to search for more medical advisors.
- Consider getting APS mentioned in more publications, including magazines.
- Consider making more videos and podcasts.
- Consider tapping in more social networking sites.
- Consider making June 9th World APS Awareness Day.
- Consider going to a Board of Directors of 5, including one medical advisor & one public non-APS person.

## **APS** Foundation of America, Inc.

Post Office Box 801 La Crosse, Wisconsin 54602-0801 Office: 608-782-2626 Fax: 608-782-6569

#### **Our Mission Statement**

Founded in June 2005, the APS Foundation of America, Inc. is dedicated to fostering and facilitating joint efforts in the areas of education, support, public awareness, research and patient services in an effective and ethical manner.

#### Our Goals

- To offer understanding and support to individuals, family, friends and care givers of people with Antiphospholipid Antibody Syndrome
- To offer information and education on Antiphospholipid Antibody Syndrome and the disabilities it can cause
- To support research regarding Antiphospholipid Antibody Syndrome by keeping the latest information available and referring people to such agencies who do research
- To raise funds to provide information and education through public donations, grants, fundraisers, sponsorships and bequests
- To bring national focus on Antiphospholipid Antibody Syndrome in the United States.

The APS Foundation of America, Inc. is the only United States nonprofit health agency dedicated specifically to bringing national awareness to Antiphospholipid Antibody Syndrome (APS), the major cause of multiple miscarriages, thrombosis, and young strokes and heart attacks. We are a volunteer-run, community-based, non-profit organization.

Women are more likely than men to be affected by APS. Some estimates say that 75% to 90% of those affected are women. For example, it has been estimated by some doctors that one third of all of young strokes (defined as under the age of 50) are due to APS.

In obstetrics it is estimated by some doctors that up to 25% of all women with 2 or more spontaneous miscarriages have APS. Some doctors believe that 1 in 5 of all Deep Vein Thrombosis (DVTs), Pulmonary Embolisms (PEs), and even worse, amputations are due to APS. And it is believed that 40-50% of patients with Lupus also have APS. Still, with these statistics, APS rarely is discussed as a women's health issue and is misdiagnosed often. Therefore the total number of people affected and true statistics are unknown really.

Antiphospholipid Antibody Syndrome (APS) is an autoimmune disorder in which the body recognizes certain normal components of blood and/or cell membranes as foreign substances and produces antibodies against them. There are two known forms of APS. APS may occur in people with systemic lupus erythematosus, other autoimmune disease, or in otherwise healthy individuals. Sadly, when most people hear about APS and it being referred to as autoimmune disease, they incorrectly confuse the terms autoimmune with acquired immune deficiency syndrome (AIDS); or they think this is a form of cancer.

This lack of knowledge and awareness results in needless suffering for persons with APS. Misdiagnosis and / or delayed diagnosis usually result in damage to vital organs. The need to bring a national attention to APS as a common factor in multiple miscarriages, thrombosis, young strokes and heart attacks is vital in order to bring a joint effort to research, funding, early detection, and eventually, prevention and cure for APS.
