2025 Year:

In 2025, the pandemic and tariffs imposed on the aftermath of the current administration led to an economic slide. General fundraising was affected because people could not afford essential goods, groceries, rent, gas, and other expenses. In general, the priority was not donating. It was not a record year, however, because of APS patients dying and those families & friends donating to APSFA.

We still have an issue with our webmaster not responding to any contact attempts. We will have to find a new webmaster. There are portions of the website we can not update, leading to a server update issue. We may need to redo the website altogether because the webmaster has abandoned us.

Professional Growth:

While we have found some classes at the University Extension of interest, we see it as prudent to save the donated dollars for other priorities.
